

# SS-ZG622 Software Project Management

## Individual Assignment # 1 (10 marks)

You will work on writing a report on **any one of the two** assigned topics related to software project management. The key elements of this assignment are listed in the report template.

The structure and expectations of the report are detailed in the report template. Your report **MUST** be written in your own words though you can refer (not copy) to material on the Internet and/or books.

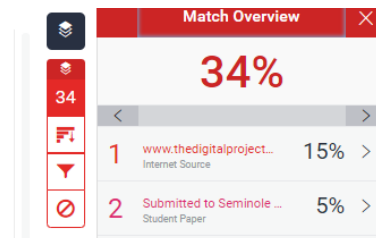

Submitted reports will be checked for plagiarism using Turnitin. Reports with similarity score 50% or above will get zero marks. For reports with similarity score between 25% and 50%, project marks will be deducted in proportion to the similarity score. Some extracts taken from plagiarism reports are given below to illustrate the kinds of copy-paste with some editing that are identified by Turnitin.

The assignment initiation section is the first phase within the task control lifestyles cycle, as it includes starting up a brand new mission. Within the initiation section, the business trouble or possibility is recognized, a solution is described, a mission is shaped, and a task team is appointed to construct and deliver the answer to the consumer. A enterprise case is created to define the hassle or possibility in element and perceive a preferred solution for implementation. The business case includes:

**2. Who Is Involved And When**

As part of Project Initiation, define the stakeholder involvement. Whether this is client or internal stakeholders, it's really important to know on who is doing tasks, signing off deliverables or reviewing and providing feedback. Creating a RACI is a good way to do this. I've written an article which takes you into the world of the RACI and helps you to create a RACI that is useful.

- the most reasons of endeavor this project.
- the advantages gained by endeavor this project currently.
- the results of not taking over this project.
