SS ZG622 – Software Project Management
2023-24 Semester I

Individual Assignment #1 (10 marks)

[<Project topic – X>]

I certify that this report submitted towards the Software Project Management course assignment is my own work. I also certify that I have not copied the work of other students or the material from any other sources (books, online documents, etc.) and/or other students' work.

I understand that if this report scores a similarity score above 50% then zero marks will be awarded for this assignment.

[your name] and [your id]

1 - Real-life Scenario

Notes:

- *four or five pages long; written entirely by you*
- *anonymize names of the company and project(s) in the description*
- *must be a real-life scenario from the current company (or any previous company where you were employed)*
- *follow the outline given below*
- *delete all the text presented in italics from your submission*
- *you are expected to collect relevant and related information from project managers/team leaders of the projects*

1.1 Company and the projects

(brief description of the company and description of one or more projects that use X)

1.2 <X>

(add one para (5 to 8 lines) on briefly describing what is the topic X; then elaborate how X is performed or approached in those projects described in 1.1)

1.3 Typical results

(present details of results or outcomes from performing <X> in those projects)

1.4 Challenges

(present difficulties or hurdles encountered in performing <X> in those projects)

difficulties or hurdles encountered in performing X
